

OPUS collection

DESIGNED BY CLAUDIO BELLINI

The Designer

Claudio Bellini (1963) architect and designer, lives and works in Milan where he runs his architecture and design practice, founded in 1996.

His global vision and capability of understanding the dynamics of various cultures and markets based on the harmony of beauty and efficiency brought him the recognition as one of the most influential European design practices all around the world.

THE INSPIRATION

The idea behind the design concept is to enhance the exposure of a working environment, hence improving collaborations and engagement within office spaces, while providing ample spaces to work at. Its wide table is suitable for many different kinds of office configurations with a middle parting for functional purposes.

OPUS is designed to create a smart, flexible, fun office furniture collection that is suitable for every kind of working environment be it a private office, collaborative or open space. The idea behind the design concept is to enhance the exposure of a working environment, hence improving collaborations and engagement within office spaces, while providing ample spaces to work at.

The word "OPUS" is derived from a Latin word that means "work". Offices have changed a lot in this new century; the traditional way of working has shifted and people want to be engaged and to build relationships within their work community.

OPUS is a high-quality and nicely designed office system that can meet the needs of various functions in the office space. The design of the table legs is inspired by the streamlined spindle A-shape pylon structure. The structure is created through the cutting and materials application which is not only three-dimensional and flexible, but also adds a bit of architectural aesthetics to the office space.

The MFC texture of OPUS is jointly developed with the design department of German MFC expert SURTECO. The pattern are clear and natural which makes veneer look more vivid and attractive.

OPUS has not only the eye pleasing appearance but also the excellent environmental friendly features; the internal core board is Grade E0, which meets the Japanese and European E0 environmental standards.

W O R K S T A T I O N

Inspire & Connect

Open Mind, Open Space

The importance of collaboration has always been at the core of the workspace, and it is the actual manifestation of the establishment of a team culture. The flexible OPUS prompts us to create an enthusiastic working atmosphere. The curved desktop and panel not only increase the softness and flexibility of the space, but also encourage employees to have better communicate and collaboration to achieve more innovations.

OPUS has created an open and stylish atmosphere for the office through the unique design of the table legs and a series of flexible combinations.

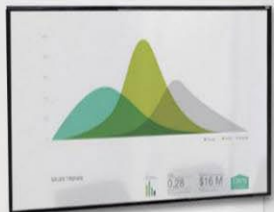

Highlights details with great impact

The unique color design of the countertop breaks through the tradition. Through the splicing of materials and colors, it gives the space a higher sense of quality and richness. The connecting beam color is sprayed with three color options of ash grey, steel grey and nebulas blue.

T12 Trapezoid Panel

T32 Aluminum Panel

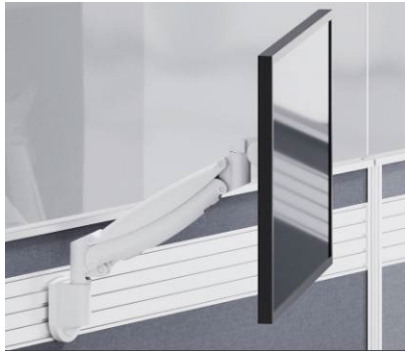

T12 Rectangle Panel

In the open office layout, the panel creates more space. The trapezoidal and rectangular shape panels meet the partition requirements while creating different space styles.

Available accessories

Name card holder

Place in a prominent position for easy identification.

Multifunctional storage tray

Place plants and stationery.

Portable stationary box

Create a memo anytime.

Monitor arm

Adjust the appropriate visual distance.

Pen jar

Hang on the screen to save space.

External power system

Application of multiple electrical devices.

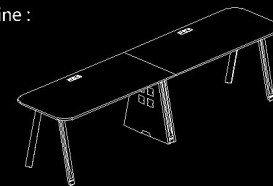

The cable riser has a simple and elegant appearance located in the corner space between the panel and the desktop. It fulfilled the needs of charging multiple electronic devices especially in the technology and financial industry.

Equipped with power socket, USB charging socket, network cable socket, telephone line socket, USB interface, HDMI interface and over-current switch socket, etc., It could supply power to all sockets at the same time.

EXECUTIVE

Focus & Private

- 2 desktop options (T25MFC liner edge/ T25MFC Paint bevel)
- Semi-open sliding door cabinet to store the files and computer case
- Aluminum legs , aluminum frame on high cabinet
- Side cabinets use silent rails, hidden handles, quiet and smooth sliding
- 2 legs types options for side cabinet(standing base/foot pad base)
- Concealed cable management system

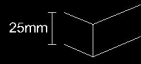

OPUS cabinet adopted more sophisticated cutting technology and the aluminum frame ,cabinet coloring and smart design details all together made it look sleek and modern. With over 20 years technical experience and the latest achievements in materials, manufacturing and technology, we achieved a 5mm cabinet diagonal cutting design , transformed from the "impossible" to "unbelievable" .

OPUS provides a good cable management solution. The patented external power supply also provides managers with backup options for multiple devices.

STORAGE

Store & decorate

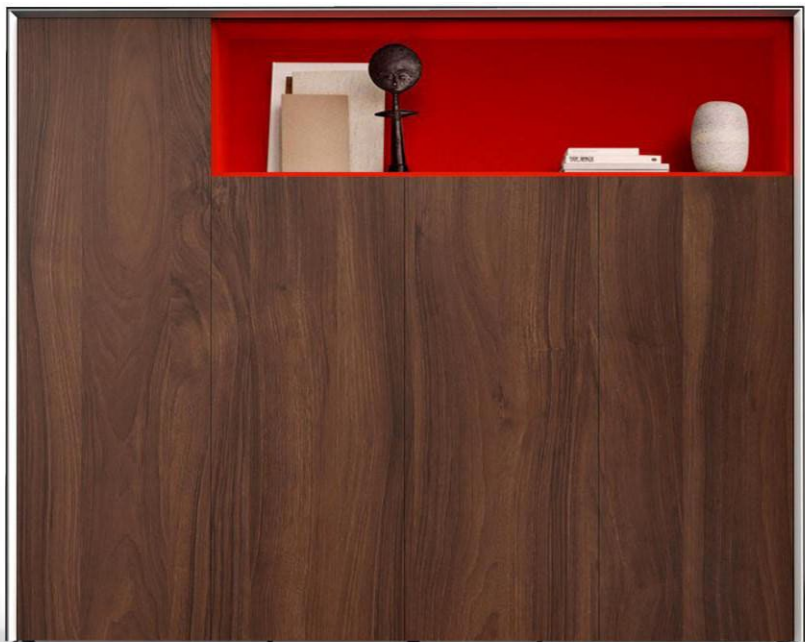

HIGH CABINET SERIES

- Our high cabinets provide you with the best storage solution. The nested colorful cabinet makes the whole space more vitality and creates a refreshing visual experience.
- The smart design of sliding handles to hide keyholes enhances appearance, function and flexibility to another level.
- The product color could be customized. You could choose the color that fits your office space.

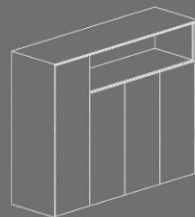

Size:
W2400 x D600 x H1800

MIDDLE HEIGHT CABINET SERIES

- Our high cabinets provide you with the best storage solution. The nested colorful cabinet makes the whole space more vitality and creates a refreshing visual experience.
- The smart design of sliding handles to hide keyholes enhances appearance, function and flexibility to another level.
- The product color could be customized. You could choose the color that fits your office environment.

Size:
W2000 x D600 x H1600

LOW CABINET SERIES

- Our high cabinets provide you with the best storage solution. The nested colorful cabinet makes the whole space more vitality and creates a refreshing visual experience.
- The smart design of sliding handles to hide keyholes enhances appearance, function and flexibility to another level.

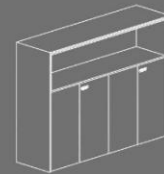

Size:
W1900 x D450 x H745

MIDDLE HEIGHT CABINET SERIES

- Besides the nested colored cabinet, we added beveled aluminum edges as decorative lines. The richness of materials and colors makes the cabinets more stylish.
- The smart design of sliding handles to hide keyholes enhances appearance, function and flexibility to another level.
- The product color could be customized. You could choose the color that fits your office environment.

Size:

W1400 x D450 x H1200
W1500 x D450 x H1200
W1600 x D450 x H1200

FF/BBF Pedestal Series

- In a modern office ,the personal storage around staff is indispensable . These two kinds of Pedestal are practical and durable that could become a diligent member in your office.

Size:
W400 x D500 x H680

Size:
W376 x D500 x H636

Hidden lock

The lock is hidden by the sliding handle. Compare to the traditional exposed locks, this design effectively enhances the aesthetics of the cabinet.

Side pull cabinet

The side cabinet saves space and at the same time increases the storage capacity. The simple movement improves work efficiency.

Pen tray and lock

The ABS plastic pen tray is practical and beautiful. It is equipped with a plastic lock instead of sharp iron parts.

Side panel ground connection

Ingeniously grooved inside with three-in-one connection, the side plate is attached to the bottom plate to prevent detaching.

Shelf holder

The aluminum holder is uniquely designed. When the laminate board is pressed, the hook-shaped end is fastened to the side board which is completely inserted into the laminate. It is safe to use and securely fastens the cabinet.

FINEST and the design team of German MFC brand SUDEKOR created exclusive MFC .

MFC : German SURTECO MFC

The surface of the tabletop is made of imported German SURTECO paper, which is not only high quality, but also has a deep log pattern design which retains the remarkable natural characteristics of the wood. Every inch of the texture is vivid. The outstanding features of scratch resistance, abrasion resistance, and impregnation resistance meet the demand for resources recycling development under the severe situation of deficient global timber resources.

Substrate: MIECO Malaysia

The plain boards used are all from MIECO in Malaysia, which is the largest board manufacturer in Asia. The board meets the highest international environmental standard-E0. The formaldehyde content of every 100g board is less than 5mg in artificial board and its products .

MFC Colors

FINEST cooperated with the Taiwan FUCHI design team to draw inspiration from nature to create FINEST exclusive fabrics. It follows the fashion trend with the features of dirt resistance, wear resistance, and stable quality.
